Assess and manage shoulder injuries in a general practice setting.

Continuing professional development for GPs, registrars and allied health professionals

Assess and manage shoulder injuries to empower your patients on their recovery journey

Join us to explore quality care and treatment options for shoulder injuries.

Presented by Dr Sommit Dan, *Orthopaedic Surgeon*, Focus Shoulder Specialists

After completion of this education session, participants will be able to:

- Explain the difference between acute and chronic rotator cuff tears.
- Demonstrate the assessment and examination in rotator cuff tears.
- Assess shoulder dislocation and apply first aid.
- Use the appropriate imaging option in rotator cuff tears and shoulder dislocation.
- Compare cortisone and surgery treatment for better outcomes for your patients.
- Discuss when surgery is required for a labral tear.
